Steadiness of Prices, in View of Activity, Caused Change for the Better.

THE BANK STATEMENT GAINS

Bond Market Yesterday Was Broader and More Active Than Stocks.

(By Associated Pross.) NEW YORK, June 11.—The short Ses-sion of the Stock Exchange to-day showed good support for prices, and the showed good support for prices, and the market closed firm at the top level of the week. There was considerable realizing, but it was evident that sufficient satisfaction was felt over the color of the monthy crop report to prompt a good absorption of this realizing. The day's gains were not atriking, but the steadiness of prices, in view of the activity of the trading, made the tone good. The

mess of prices, in view of the activity of the trading, made the tone good. The bank statements showed about the expected gain in cash resources and sufficient to meet the added reserve requirements by reason of the rise in deposits with a margin of \$3,891,825, which went to enhance the surplus reserve of the banks. The market for investment securities begins to reflect unmistakable pressure to find employment for idle capital.

To-day's bond market was broader and more active than that of stocks. It is pointed out also that a large business is being done in high grade railroad bonds over the counties of bond houses, which does not figure in the Stock Exchange transactions. The Financial Chronicle estimates that the municipal bond saies for May reached \$44,404,333. This includes that \$40,00,000 New York city bond issue, but the aggregate figures reach to one-third the total sales of municipal bonds for the full calendar year, 1903. The same was asserts that the active demand for municipal issues is prompting the continued floatation of unusually large amounts of bonds. Total sales of bonds to-day, par value, \$1,50,000.

Total sales of stocks were 132,400 shares.

Dibrell Bres. say of the tobacco market fo

Dibroll Bros. say of the tobacco market for the week!

Our sales have been heavier this week than last and moderately large for the season of ten year. An area of the season shows the year har recordly. The tobacco marketed years have recordly. The tobacco marketed prought in on wagon. There has been well in the wagon, there has been very little shipped tobacco on the breaks this week. The quality has not been up to the usual standard, but occasionally some very good wrappers have appeared in the breaks. Prices show no change over last week, and the market has not been altogether as lively as heretofors. There appear to be fairly good ordered for domestic consumption. The evaluation are down in the season of the season of a retail character and very little of came quence has been rather favorable on the newly set plants.
